THE EVOLUTION OF THE ETF SPECIES

OUR TAKE: COMPETITION FOR ATTENTION

- ▶ Build on model of product market competition in which consumers have limited attention (Bordalo, Gennaioli, and Shleifer, 2016)
- ▶ Consumers give disproportionate weight to *salient* features, neglect non-salient features
- ▶ Two features: **Price vs. Quality**
 - ▶ Quality: Any product characteristic that consumers find appealing
- ▶ Two equilibria in product markets:
 - ▶ Price-salient: Fast food, low-cost air travel, **Walmart**
 - ▶ Quality-salient: High fashion, business class, **Starbucks**

COMPETITION FOR ATTENTION IN THE ETF SPACE

BROAD-BASED ETFs: PRICE COMPETITION

- ▶ Low differentiation
- ▶ Low fees, low risk
- ▶ Target: Cost-conscious investors

SPECIALIZED ETFs: QUALITY COMPETITION

- ▶ **Quality:** High “expected” returns; Gambling opportunities; Investor values (e.g., ESG, religion)
- ▶ Differentiated portfolios
- ▶ High fees, high risk
- ▶ Target: Investors with non-standard preferences and expectations

CONCLUSION

WHAT DRIVES FINANCIAL INNOVATION IN THE ETF MARKET?

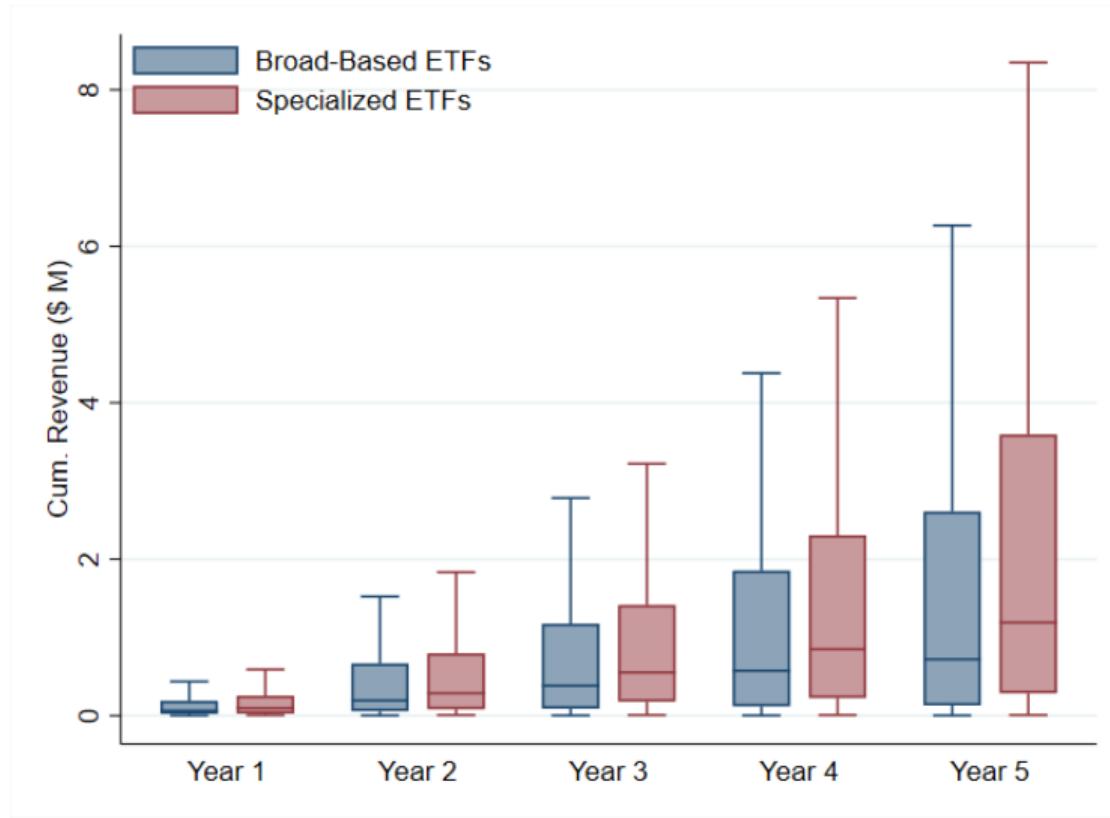

- ▶ Competition for **investor attention**:
 - ▶ Price competition: Price-sensitive investors looking for broad market exposure
 - ▶ Quality competition: Sentiment-driven investors chasing salient themes
- ▶ The same platform is used for diverging purposes

QUALITY COMPETITION: MECHANISM

- ▶ Salient themes → Demand for the theme → Overvaluation
- ▶ Providers cater to demand with a lag → Underperformance of Specialized ETFs
