Underlying data are from FactSet. Fund characteristics are weighted averages by security weight and derived by Alpha Architect. Mkt. Cap. is defined as the total market value of the company's listed equity in millions. Momentum is defined as the cumulative total return for the past 12 months, excluding the most recent month. Momentum is a characteristic of the underlying holdings and should not be construed as fund or index performance. ROA is defined as net income divided by total assets. Active share is the percentage of a portfolio's stock holdings that differ from its benchmark index. Active Share is not a performance measurement.

Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Market price returns are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times. For performance data current to the most recent month end, please call 215.882.9983 or visit www.AlphaArchitect.com/funds. "Mid-Cap" is the Vanguard Mid-Cap ETF, which seeks to track the CRSP US Mid-Cap Index (Mid-Cap). "Mid-Growth" is the Vanguard Mid-Cap Growth ETF, which seeks to track the CRSP US Mid Cap Growth Index (Mid-Growth).*

DISCLOSURES

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contains this and other important information about the investment company, and it may be obtained once available by calling 215-882-9983 or visiting www.AlphaArchitect.com/Funds. Read it carefully before investing.

Investments involve risk. Principal loss is possible. Redemptions are limited and often commissions are charged on each trade. Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value. Investments in mid cap companies involve limited liquidity and greater volatility than larger companies.

Momentum investing is investing in or having exposure to securities with positive momentum entails investing in securities that have had above-average recent returns. These securities may be more volatile than a broad cross-section of securities. Returns on securities that have previously exhibited momentum may be less than returns on other styles of investing or the overall stock market. Momentum can turn quickly and cause significant variation from other types of investments, and stocks that previously exhibited high momentum may not experience continued positive momentum. In addition, there may be periods when the momentum style is out of favor, and during which the investment performance of the Fund using a momentum strategy may suffer. The performance of the Fund and its Index may differ due to tracking error.
