

FUND DESCRIPTION

The Viridi Bitcoin Miners ETF*, **RIGZ**, is the first of its kind, seeking capital appreciation by investing exclusively in the Bitcoin mining vertical. RIGZ will not invest in Bitcoin directly or indirectly through the use of derivatives. The fund consists of:

Bitcoin Miners: Companies who process transactions on the Bitcoin network in exchange for newly minted Bitcoin.

Semiconductors: Companies who fabricate and/or manufacture chips that are used in specialized Bitcoin mining computers.

WHY RIGZ?

- **RIGZ** is **actively managed** by industry practitioners with Bitcoin mining expertise.
- **RIGZ** is carefully constructed using robust financial modeling and proprietary valuation metrics. Viridi strongly values operators utilizing renewable energy.
- **RIGZ** is much more than just a Bitcoin proxy - it offers **enhanced exposure**. Miners have balance sheet positions & operational leverage to magnify their upside, with uncorrelated infrastructure assets to insulate their downside.
- **RIGZ** is an opportunity to invest in the **infrastructure** that underpins the blockchain and facilitates Bitcoin's disruptive currency network.
- **RIGZ** is **brokerage account eligible** – own it alongside your retirement assets with no need to worry about private keys or hacks.

Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. To obtain performance as of the most recent month end, visit www.viridifunds.com/rigz-etf.

The Hypothetical Growth of \$10,000 chart, above, reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.

Shares are bought and sold at market price not net asset value (NAV). Market price returns are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times. A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. Due to unusual market conditions, the fund's relatively high performance may not be sustainable or repeated in the future.

IMPORTANT INFORMATION

*On May 23, 2022, the Fund changed its name from Viridi Cleaner Energy Crypto-Mining and Semiconductor ETF to Viridi Bitcoin Miners ETF. In addition, the Fund is no longer held by prospectus to its clean energy screen.

Investments involve risks Principal loss is possible. ETFs may trade at a premium or discount to their net asset value. Redemptions are limited and often brokerage commissions are charged on each trade which may reduce returns.

The Fund will not invest directly in cryptocurrencies such as Bitcoin, however it invests in companies involved in the cryptocurrency industry such as mining and manufacturers which can be very volatile. There is no assurance that the cryptocurrency network or service providers will continue in existence or grow. Technology and semiconductor companies may have limited product lines, financial resources and could face intense competition and rapid product obsolescence. Cryptocurrency functionality relies on the Internet and a significant disruption of connectivity could impede functionality and the risk of fraud or cyber-attack which could have adverse effect on the Fund's investments.

Investments in foreign securities and depositary receipts are subject to the risks of foreign jurisdictions including, restrictions on the ability to repatriate assets, currency transfers and fluctuations, political, risks, regulatory and market risks. Depositary receipts represent shares of foreign-based corporations and may be less liquid than the underlying shares in their primary trading market.

The Fund may invest in companies that have recently completed an IPO (initial public offering), are derived from a SPAC (Special Purpose Acquisition Company) or result from a Reverse Merger. These companies may be unseasoned and lack a trading history and track record IPOs and stocks derived from SPACS or Reverse Mergers are thus often subject to extreme price volatility and speculative trading. The fund invests in micro-, small- and mid-capitalization sized companies which could have less liquidity and lower trading volumes which tend to make their market price fall more in response to selling pressures and may have limited markets, product lines or financial resources.

The Hashrate Index (HI) Crypto Mining Stock Index is a comprehensive index of Bitcoin mining-related stocks of public mining rig manufacturers, foundries, and miners. The associated performance data has been compiled from reported daily closing prices of the index.

The Fund is non-diversified and may be more sensitive to economic, business, political or other changes affecting certain issuers or a particular industry which may increase risk or result in greater fluctuation in share value. The Fund was recently organized with limited operating history to evaluate.

Empowered Funds, LLC serves as the Fund's Investment Advisor and New Gen Minting, LLC, d/b/a Viridi Funds, serves as the Fund's Sub-Advisor.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling (215) 882-9983, or by visiting www.viridifunds.com. Read it carefully before investing.

The Fund is distributed by Quasar Distributors, LLC.
