**Supplement dated July 17, 2023 to the
Prospectus and Statement of Additional Information both dated April 5, 2023**

*The information below replaces the information on the Fund's independent registered public accounting firm contained in the section **Other Service Providers**, found on page 11 of the Prospectus.*

Tait, Weller & Baker, LLP, 50 South 16th Street, Suite 2900, Philadelphia, PA 19102, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

*The information below replaces the information on the Fund's independent registered public accounting firm contained in the section **Accounting and Legal Service Providers**, found on page 19 of the Statement of Additional Information.*

ACCOUNTING AND LEGAL SERVICE PROVIDERS

Independent Registered Public Accounting Firm

Tait, Weller & Baker, LLP, 50 South 16th Street, Suite 2900, Philadelphia, PA 19102, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

*The information below replaces the information on the Fund's Trustees and Officers contained in the section **Management of the Fund**, found on pages 9-10 of the Statement of Additional Information.*

MANAGEMENT OF THE FUND

Trustees and Officers

The business and affairs of the Trust are managed by its officers under the oversight of its Board. The Board sets broad policies for the Trust and may appoint Trust officers. The Board oversees the performance of the Adviser, the Sub-Adviser, and the Trust's other service providers. Each Trustee serves until his or her successor is duly elected or appointed and qualified.

The Board is comprised of four Trustees. One Trustee and certain of the officers of the Trust are directors, officers or employees of the Adviser. The other Trustees (the "Independent Trustees") are not "interested persons" (as defined in Section 2(a)(19) of the Investment Company Act) of the Trust. The fund complex includes all funds advised by the Adviser ("Fund Complex").

The Trustees, their age, term of office and length of time served, their principal business occupations during the past five years, the number of portfolios in the Fund Complex overseen and other directorships, if any, held by each Trustee, are shown below. The officers, their age, term of office and length of time served and their principal business occupations during the past five years are shown below. Unless noted otherwise, the address of each Trustee and each Officer is: c/o EA Series Trust, 19 East Eagle Road, Havertown, PA 19083.

BRIDGES CAPITAL TACTICAL ETF

Fund Summary

INVESTMENT OBJECTIVE

Bridges Capital Tactical ETF (the “Fund”) seeks to provide capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.**

ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

Management Fee ¹	0.78%
Distribution and/or Service (12b-1) Fees	None
Other Expenses ²	0.00%
Acquired Fund Fees and Expenses ²	0.00%
Total Annual Fund Operating Expenses	<u>0.78%</u>

¹ The Fund’s investment advisory agreement provides that the Adviser will pay substantially all expenses of the Fund, except for the fee payment under the Fund’s Investment Advisory Agreement, payments under the Fund’s Rule 12b-1 Distribution and Service Plan, brokerage expenses, acquired fund fees and expenses, taxes, interest (including borrowing costs), litigation expense and other non-routine or extraordinary expenses. Additionally, the Fund shall be responsible for its non-operating expenses and fees and expenses associated with the Fund’s securities lending program, if applicable.

² Other Expenses and Acquired Fund Fees and Expenses are estimated for the current fiscal year.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year:	Three Years:
\$80	\$249

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. At the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed, diversified exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing in a blend of passively managed U.S. equity index ETFs, large-capitalization equity securities and cash or cash equivalents. The allocation and rebalancing of the Fund’s investments is based on proprietary analysis by the Fund’s sub-adviser, Bridges Capital, LLC (the “Sub-Adviser”), of macroeconomic events, changing market breadth, and volatility.

It is expected that the Fund will generally hold 5 to 20 investments selected from a universe that includes large-capitalization U.S. equity securities and passively managed index ETFs tracking U.S. small-, mid- and large-capitalization equity indexes (the “Indexes”), including but not limited to the S&P 500 Index (the “S&P 500”), the Nasdaq-100 and the Russell 2000 Index (the “Russell 2000”). For purposes of the Fund’s investments, the Sub-Adviser considers large-capitalization securities to consist of the top 10 holdings in both the Nasdaq-100 and the S&P 500. The Sub-Adviser will deduct for overlap between the two indexes and remove some names based on its proprietary valuation and volatility analysis. The Sub-Adviser will then filter these companies based on its analysis of company growth opportunities, volatility, and downside risk to select the large-capitalization U.S. equity securities for the Fund.

The Fund seeks to provide capital appreciation with a focus on capital preservation during periods determined by the Sub-Adviser to pose greater risk of overall market drawdowns. To identify portfolio investments, the Sub-Adviser has developed the following multi-step investment process:

Step 1: The Sub-Adviser will develop a thesis based on overall market environment and economic conditions (the “Macro-Thesis”). Examples of macro-events that could affect the Macro-Thesis may include, but are not limited to, Federal Reserve posture on interest rates and quantitative easing or tightening, trends of growing or shrinking earnings, revisions of earnings, and hiring or layoffs from top 10-20% component companies in the Nasdaq-100 and/or S&P 500. This Macro-Thesis determines a bias to focus the Fund’s strategy on a more risk-on (bullish) posture or a more risk-averse (bearish) posture. Changes to the Macro-Thesis are rare, occurring less than annually and are determined by multiple quarters of fundamental data indicating to the Sub-Adviser that fundamental conditions outlined above exist to support the change. During periods of risk-on, the Fund will experience less rebalancing and tend to be more fully invested for longer periods, multiple months at a time, than during the risk-averse posture. A fully invested portfolio consists of approximately 75% of Fund assets in passively managed index ETFs and approximately 20% invested in individual equities determined by the Sub-Adviser outlined in the process above. A partially invested portfolio consists of approximately 80% of Fund assets invested in cash or cash-equivalents and approximately 20% invested in individual equities. During periods of risk-aversion, the Fund will be partially invested for longer periods, experience more rebalancing, approximately 2 times per month, and tend to hold more cash or cash-equivalents (i.e., money market funds or T-Bill funds), for longer periods than during the risk-on posture. The rebalancing primarily consists of moving approximately 75% of Fund assets to or from passively managed index ETFs to or from cash or cash-equivalents. The portfolio will remain with this allocation until the Sub-Adviser determines the next time to rebalance as outlined in Step 2 below. Timing of the rebalancing of the portfolio is different than a change to the Macro-Thesis (risk-on vs risk-aversion), as rebalancing occurs multiple times throughout the year and changes to the Macro-Thesis occur less than annual.

Step 2: In order to determine the timing to rebalance the Fund portfolio, the Sub-Adviser will analyze current market breadth participation and volatility. Market breadth refers to each of the companies listed on the Nasdaq Composite and the New York Stock Exchange. Participation refers to how many companies are contributing to the current trend of the Indexes they are contained in, as opposed to working against the trend, along with how far they have moved along that existing trend. Trends are identified using a proprietary analysis and metric of the Sub-Adviser, which identifies the current price of the company or Index, compared to a previous price point where the Sub-Adviser identified a change in the daily direction of the company or Index. Volatility refers to near-term (< 1-month) vs longer-term (>3-month). Volatility is measured using the implied volatility of Index options over the reference time periods of <1-month and >3 months.

Step 3: The Sub-Adviser rebalances the Fund’s portfolio when the Sub-Adviser’s proprietary analysis of breadth and volatility outlined in Step 2 identifies a change in market dynamics. Individual equity holdings are seldom rebalanced. In times where the Macro-Thesis is bearish, rebalancing occurs approximately two times per month. In times where the Macro-Thesis is bullish, rebalancing occurs approximately six times per year. Rebalancing is subject to more or less frequent changes, depending on the Sub-Adviser’s proprietary analysis.

The Sub-Adviser’s sell discipline is identified in two areas. The first is the opportunity to sell from the Fund’s allocation to passively managed ETFs based on the proprietary analysis outlined in Step 2 above. The second sell discipline is the opportunity to sell from the Fund’s allocation to individual equity holdings. Total investments into the individual company allocation of Fund assets are generally limited to 20% in aggregate and equally weighted among the individual companies. This is a long-term allocation with selling occurring when a company falls out of the top 10 status of the corresponding index or the Sub-Adviser identifies a risk to the company’s overall long-term growth prospects. Examples of these risks could include, but are not limited to, market saturation with new entrants of competition or top executive management change.

PRINCIPAL RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading “*Additional Information About the Fund’s Risks*”.

Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser’s or Sub-Adviser’s success or failure to implement investment strategies for the Fund.

Risk of Investing in Other ETFs. Because it invests other ETFs, the Fund’s investment performance is impacted by the investment performance of the selected underlying ETFs. An investment in the Fund is subject to the risks associated with the ETFs that then-currently comprise the Fund’s portfolio. At times, certain of the segments of the market represented by the Fund’s underlying ETFs may be out of favor and underperform other segments. The Fund will indirectly pay a proportional share of the expenses of the underlying ETFs in which it invests (including operating expenses and management fees), which are identified in the fee schedule above as “Acquired Fund Fees and Expenses.”

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. To the extent the Fund gains exposure to securities of mid-capitalization companies through its investments in other ETFs, investments in such companies involve greater risk than customarily is associated with investing in larger, more established companies. These companies’ securities may be more volatile and less liquid than those of more established companies. Often mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

Small-Capitalization Companies Risk. To the extent the Fund gains exposure to securities of small-capitalization companies through its investments in other ETFs, investments in such companies involves greater risk than customarily is associated with investing in larger, more established companies. Small-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people. Price movements of small-capitalization companies may be more volatile than mid-capitalization and large-capitalization companies.

Cash and Cash Equivalents Risk. To the extent the Fund’s assets are allocated to cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time. Cash equivalents include shares in money market funds that invest in short-term, high-quality instruments such as Treasury bills and notes, the value of which generally are tied to changes in interest rates. Cash equivalents are not guaranteed as to principal or interest, and the Fund could lose money through these investments.

Geopolitical/Natural Disaster Risks. The Fund’s investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

ETF Risks

- **Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- **Premium-Discount Risk.** The Shares may trade above or below their NAV. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on The Nasdaq Stock Market, LLC (the “Exchange”) or other securities exchanges. The existence of significant market volatility, disruptions to creations and redemptions, or potential lack of an active trading market for Fund Shares (including through a trading halt), among other factors, may result in the Shares trading significantly above (at a premium) or below (at a discount) to NAV. If you buy Fund Shares when their market price is at a premium or sell the Fund Shares when their market price is at a discount, you may pay more than, or receive less than, NAV, respectively.
- **Cost of Trading Risk.** Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors incur the cost of the “spread” also known as the “bid-ask spread”, which is the difference between what investors are willing to pay for Fund Shares (the “bid” price) and the price at which they are willing to sell Fund Shares (the “ask” price). The bid-ask spread varies over time based on, among other things, trading volume, market liquidity and market volatility. Because of the costs inherent in buying or selling Fund Shares, frequent trading may detract significantly from investment results and an investment in Fund Shares may not be advisable for investors who anticipate regularly making small investments due to the associated trading costs.
- **Trading Risk.** Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of the Fund’s Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be significantly less liquid than the Fund’s Shares, potentially causing the market price of the Fund’s Shares to deviate from its NAV.

New Sub-Adviser Risk. The Sub-Adviser has no experience with managing an ETF, which may limit the Sub-Adviser’s effectiveness. In addition, although the Sub-Adviser has retained third-party vendors to perform certain functions (e.g., compliance services, operations, etc.), it employs a single individual and has limited resources, which may prevent it from being able to continue to provide sub-advisory services if the principal becomes incapacitated. Over time, the Sub-Adviser will augment its resources as market conditions permit. In addition, the Sub-Adviser regularly evaluates its business continuity plan with the Adviser to ensure continuity of operations and portfolio management should a disruption to operations occur.

New Fund Risk. The Fund is new with no operating history as of the date of the prospectus. As a result, prospective investors have no or limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

PERFORMANCE

Performance information is not provided below because the Fund has not yet been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Performance information is available on the Fund's website at www.bridgesetf.com or by calling the Fund at (215) 882-9983.

INVESTMENT ADVISER & INVESTMENT SUB-ADVISER

Investment Adviser: Empowered Funds, LLC dba EA Advisers ("Adviser")
Investment Sub-Adviser: Bridges Capital, LLC ("Sub-Adviser")

PORTFOLIO MANAGERS

Raymond T. Bridges is the founder and Managing Member of the Sub-Adviser and has been primarily responsible for the day-to-day management of the Fund since its inception in 2023.

SUMMARY INFORMATION ABOUT PURCHASES, SALES, TAXES, AND FINANCIAL INTERMEDIARY COMPENSATION

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 10,000 Shares, called "Creation Units," and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed 'in-kind' for securities and partially in cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market prices that change throughout the day. Market prices of Shares may be greater or less than their NAV. **Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.**

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is in an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

How is the Fund Different from a Mutual Fund?

Redeemability. Mutual fund shares may be bought from, and redeemed with, the issuing fund for cash at NAV typically calculated once at the end of the business day. Shares of the Fund, by contrast, cannot be purchased from or redeemed with the Fund except by or through APs (typically, broker-dealers), and then principally for an in-kind basket of securities (and a limited cash amount). In addition, the Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 10,000 Shares, called “Creation Units.”

Exchange Listing. Unlike mutual fund shares, Shares of the Fund will be listed for trading on the Exchange. Investors can purchase and sell Shares on the secondary market through a broker. Investors purchasing Shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. Secondary-market transactions do not occur at NAV, but at market prices that change throughout the day, based on the supply of, and demand for, Shares and on changes in the prices of the Fund’s portfolio holdings. The market price of Shares may differ from the NAV of the Fund. The difference between market price of Shares and the NAV of the Fund is called a premium when the market price is above the reported NAV and called a discount when the market price is below the reported NAV, and the difference is expected to be small most of the time, though it may be significant, especially in times of extreme market volatility.

Tax Treatment. The Fund and the Shares have been designed to be tax-efficient. Specifically, the in-kind creation and redemption feature has been designed to protect Fund shareholders from adverse tax consequences applicable to non-ETF registered investment companies as a result of cash transactions in the non-ETF registered investment company’s shares, including cash redemptions. Nevertheless, to the extent redemptions from the Fund are paid in cash, the Fund may realize capital gains or losses, including in some cases short-term capital gains, upon the sale of portfolio securities to generate the cash to satisfy the redemption.

Transparency. The Fund’s portfolio holdings are disclosed on its website daily after the close of trading on the Exchange and prior to the opening of trading on the Exchange the following day. A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (“SAI”).

Premium/Discount Information. Information about the premiums and discounts at which the Fund’s Shares have traded will be available at www.bridgesetf.com.

ADDITIONAL INFORMATION ABOUT THE FUND’S INVESTMENT OBJECTIVE AND PRINCIPAL STRATEGIES

The Fund’s investment objective is to provide long term capital appreciation. The Fund’s investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders with prior written notice to shareholders.

The Fund is an actively managed ETF that seeks to achieve its investment objective by investing in a blend of passively-managed U.S. equity ETFs, large-cap equities and cash or cash equivalents. The allocation and rebalancing of the Fund’s investments is based on a proprietary analysis by the Sub-Adviser of macroeconomic events, changing market breadth, and volatility. The Fund seeks to provide capital appreciation with a focus on capital preservation during periods determined by the Sub-Adviser to pose greater risk of overall market drawdowns. The Fund will generally hold 5 to 20 holdings that are selected from a universe that includes large-capitalization U.S. equity securities and passively managed ETFs tracking U.S. equity small-, mid- and large-capitalization indexes, including but not limited to the S&P 500, the Nasdaq-100 and the Russell 2000. For purposes of the Fund’s investments, the Sub-Adviser considers large-capitalization securities to consist of the top 10 holdings in both the Nasdaq-100 and the S&P 500. The Sub-Adviser will deduct for overlap between the two indexes and remove some names based on its proprietary valuation and volatility analysis. The Sub-Adviser will then filter these companies based on its analysis of company growth opportunities, volatility, and downside risk to select the large-capitalization U.S. equity securities for the Fund. As discussed in the summary section of the prospectus, the Sub-Adviser utilizes a multi-step process that is based on the development of a Macro-Thesis and a risk-on (bullish) posture or a more risk-averse (bearish) posture and a determination of an appropriate investment allocation and timing of rebalancing through proprietary analysis by the Sub-Adviser of current market breadth participation and volatility.

It is expected that the Fund will be diversified and that each individual equity holding will represent less than 10% of the Fund's overall portfolio, with individual equity positions equally weighted and in total representing approximately 20% of the Fund's assets. The Fund will generally hold approximately 5% of its assets in cash or cash or cash equivalents. The Sub-Adviser expects the remaining approximately 75% of the portfolio to be represented by passively managed index ETF portfolio positions when the Fund is fully invested, with each ETF position representing up to 25% of the Fund's portfolio, or in cash or cash equivalents when the Fund is partially invested.

An example portfolio allocation between fully invested or partially invested, as outlined in the 3-step rebalancing process above and subject to the proprietary analysis of the Sub-Adviser, would typically be as follows:

	Fully Invested	Partially Invested
Individual Equities (approx. 10 companies)	20%	20%
Passively Managed Index ETFs	75%	0%
Cash or Cash Equivalents	5%	80%

Though individual equity holdings are seldom rebalanced, all stocks in the portfolio are continually monitored, with portfolio changes generally occurring monthly. Portfolio changes may occur more frequently when major events are believed by the Sub-Adviser to likely have an impact on the Fund's portfolio. Tactical allocation and rebalancing occurs primarily with the purchase and sale of passively managed ETFs to cash and cash equivalents and vice versa. In times where the Macro-Thesis is bearish, rebalancing occurs approximately two times per month. In times where the Macro-Thesis is bullish, rebalancing occurs approximately six times per year. Rebalancing is subject to more or less frequent changes, depending on the Sub-Adviser's proprietary analysis.

Temporary Defensive Positions. From time to time, the Fund may take temporary defensive positions that are inconsistent with its principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. In those instances, the Fund may hold up to 100% of its assets in cash; short-term U.S. government securities and government agency securities; investment grade money market instruments; money market mutual funds; investment grade fixed income securities; repurchase agreements; commercial paper; cash equivalents; and exchange-traded investment vehicles that principally invest in the foregoing instruments. As a result of engaging in these temporary measures, the Fund may not achieve its investment objective.

ADDITIONAL INFORMATION ABOUT THE FUND'S PRINCIPAL RISKS

The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the sections titled "Fund Summary—Principal Investment Risks" above.

Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser's or Sub-Adviser's success or failure to implement investment strategies for the Fund. The success of the Fund's investment program depends largely on the investment techniques and risk analyses applied by the Sub-Adviser. It is possible the investment techniques and risk analyses employed on behalf of the Fund will not produce the desired results. In addition, the Adviser's and Sub-Adviser's evaluations and assumptions regarding investments may not successfully achieve the Fund's investment objective given actual market trends. Absent unusual circumstances (e.g., the Adviser determines a different security has higher liquidity but offers a similar investment profile as a recommended security), the Adviser will generally follow the Sub-Adviser's investment recommendations to buy, hold, and sell securities and financial instruments.

Risk of Investing in Other ETFs. Because it invests other ETFs, the Fund's investment performance is impacted by the investment performance of the selected underlying ETFs. An investment in the Fund is subject to the risks associated with the ETFs that then-currently comprise the Fund's portfolio. At times, certain of the segments of the market represented by the Fund's underlying ETFs may be out of favor and underperform other segments. The Fund will indirectly pay a proportional share of the expenses of the underlying ETFs in which it invests (including operating expenses and management fees), which are identified in the fee schedule above as "Acquired Fund Fees and Expenses."

A passively managed ETF is an investment company whose goal generally is to track or replicate a desired index, such as a market or global segment. ETFs are traded on exchanges and trade similarly to publicly-traded companies. ETFs also have risks and costs that are similar to publicly-traded companies. The goal of many ETFs is to correspond generally to the price and yield performance, before fees and expenses, of its underlying index. The risk of not correlating to the index is an additional risk borne by the investors of such ETFs. Because ETFs trade on an exchange, they may not trade at NAV. Sometimes, the prices of ETFs may vary significantly from the NAVs of the ETF's underlying securities.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. To the extent the Fund gains exposure to securities of mid-capitalization companies through its investments in other ETFs, investments in such companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some of these companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies.

Small-Capitalization Companies Risk. To the extent the Fund gains exposure to securities of small-capitalization companies through its investments in other ETFs, investments in such companies involves greater risk than customarily is associated with investing in larger, more established companies. Small-capitalization companies often have less predictable earnings, more limited product lines, markets, distribution channels and financial resources, and the management of such companies may be dependent upon one or few people. Price movements of small-capitalization companies may be more volatile than mid-capitalization and large-capitalization companies. Small-capitalization companies may also be bought and sold less often and in smaller amounts than larger company stocks. As a result, if the Sub-Adviser wants to sell a large quantity of a small-capitalization company's stock, it may have to sell at a lower price than it might prefer, or it may have to sell in smaller than desired quantities over a period of time.

Cash and Cash Equivalents Risk. Holding cash or cash equivalents rather than securities or other instruments in which the Fund primarily invests, even strategically, may cause the Fund to risk losing opportunities to participate in market appreciation, and may cause the Fund to experience potentially lower returns than the Fund's benchmark or other funds that remain fully invested. In rising markets, holding cash or cash equivalents will negatively affect the Fund's performance relative to its benchmark. There is the risk that the value of the Fund's cash and cash equivalents, including interest, will not keep pace with inflation, thus reducing purchasing power over time. Cash equivalents include shares in money market funds and ETFs that invest in short-term, high-quality instruments such as Treasury bills and notes, the value of which generally are tied to changes in interest rates. Cash equivalents are not guaranteed as to principal or interest, and the Fund could lose money through these investments.

Geopolitical/Natural Disaster Risks. The Fund's investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a global pandemic and major disruption to economies and markets around the world, including the United States. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced particularly large losses. For some companies, dividend payments have been delayed, reduced, or rescinded. These circumstances may continue for an extended period of time, and may affect adversely the value and liquidity of the Fund's investments.

ETF Risks.

- **APs, Market Makers, and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- **Premium-Discount Risk.** The Shares may trade above or below their NAV. The NAV of the Fund will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares, however, will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange and other securities exchanges. The existence of significant market volatility, disruptions to creations and redemptions, or potential lack of an active trading market for Fund Shares (including through a trading halt), among other factors, may result in the Shares trading significantly above (at a premium) or below (at a discount) to NAV. If you buy Fund Shares when their market price is at a premium or sell the Fund Shares when their market price is at a discount, you may pay more than, or receive less than, NAV, respectively. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities held by the Fund. However, given that Shares can be purchased and redeemed in large blocks of Shares, called Creation Units (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), and the Fund's portfolio holdings are fully disclosed on a daily basis, the Adviser believes that large discounts or premiums to the NAV of Shares should not be sustained, but that may not be the case.
- **Cost of Trading Risk.** Investors buying or selling Shares in the secondary market pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if the Fund's Shares have more trading volume and market liquidity and higher if the Fund's Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Because of the costs inherent in buying or selling Fund Shares, frequent trading may detract significantly from investment results and an investment in Fund Shares may not be advisable for investors who anticipate regularly making small investments due to the associated trading costs.

- **Trading Risk.** Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will be maintained. In stressed market conditions, the liquidity of the Fund's Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be significantly less liquid than the Fund's Shares, potentially causing the market price of the Fund's Shares to deviate from its NAV. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

New Sub-Adviser Risk. The Sub-Adviser has no experience with managing an ETF, which may limit the Sub-Adviser's effectiveness. In addition, although the Sub-Adviser has retained third-party vendors to perform certain functions (e.g., compliance services, operations, etc.), it employs a single individual and has limited resources, which may prevent it from being able to continue to provide sub-advisory services if the principal becomes incapacitated. Over time, the Sub-Adviser will augment its resources as market conditions permit. In addition, the Sub-Adviser regularly evaluates its business continuity plan with the Adviser to ensure continuity of operations and portfolio management should a disruption to operations occur.

New Fund Risk. The Fund is new with no operating history as of the date of the prospectus. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

FUND MANAGEMENT

Investment Adviser

EA Advisers acts as the Fund's investment adviser. The Adviser is located at 19 East Eagle Road Havertown, PA 19083 and is wholly-owned by Alpha Architect LLC. The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services solely to the Fund and other exchange-traded funds. The Adviser was founded in October, 2013.

The Adviser performs its services to the Fund pursuant to the terms of investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. The Adviser is entitled to receive the following Advisory Fee: 0.78% (annual rate as a percentage of average daily net assets). Because the Fund has not commenced operations prior to the date of this Prospectus, the Adviser did not receive a fee during the last fiscal year.

The Adviser (or an affiliate of the Adviser) bears all of the Adviser's own costs associated with providing these advisory services and all expenses of the Fund, except for the fee payment under the Advisory Agreement, payments (if any) under a Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses, taxes (including tax-related services), interest (including borrowing costs), litigation expense (including class action-related services) and other non-routine or extraordinary expenses.

The Advisory Agreement for the Fund provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned.

Investment Sub-Adviser

The Adviser has retained Bridges Capital, LLC, an investment adviser registered with the SEC, to provide sub-advisory services for the Fund. Sub-Adviser is organized as a Florida limited liability company with its principal offices located at 3328 NE 32nd Street, Fort Lauderdale, Florida 33308. The Sub-Adviser was formed in 2018 and provides investment management and financial planning services to individuals and family offices. As of December 31, 2022, the Sub-Adviser had approximately \$11 million in total assets under management.

The Sub-Adviser is responsible for selecting the investments for the Fund in accordance with the Fund's objectives, policies and restrictions. The Sub-Adviser is not responsible for selecting brokers or placing the Fund's trades. Rather, the Sub-Adviser constructs the overall portfolio and provides trading instructions to the Adviser, and, in turn, the Adviser is responsible for selecting brokers and placing the Fund's trades.

For its services, the Adviser pays Sub-Adviser a fee, which is calculated daily and paid monthly, at an annual rate based on the Fund's average daily net assets as follows: 0.39% (annual rate as a percentage of average daily net assets).

Fund Sponsor

The Adviser has entered into a fund sponsorship agreement with the Sub-Adviser pursuant to which the Sub-Adviser is also the sponsor of the Fund ("Fund Sponsor"). Under this arrangement, the Fund Sponsor has agreed to provide financial support to the Fund (as described below) and, in turn, the Adviser has agreed to share with the Fund Sponsor a portion of profits, if any, generated by the Fund's Advisory Fee (also as described below). Every month, the Advisory Fee, which is a unitary management fee, is calculated and paid to the Adviser.

If the amount of the unitary management fee exceeds the Fund's operating expenses and the Adviser-retained amount, the Adviser pays the net total to the Fund Sponsor. The amount paid to the Fund Sponsor represents both the sub-advisory fee and any remaining profits from the Advisory Fee. During months where there are no profits or the funds are not sufficient to cover the entire sub-advisory fee, the sub-advisory fee is automatically waived.

If the amount of the unitary management fee is less than the Fund's operating expenses and the Adviser-retained amount, Fund Sponsor is obligated to reimburse the Adviser for the shortfall.

APPROVAL OF ADVISORY AGREEMENT & INVESTMENT SUB-ADVISORY AGREEMENT

A discussion regarding the basis for the Board's approval of the Advisory Agreement and the sub-advisory agreement with respect to the Fund will be available in the Fund's semi-annual report.

PORTFOLIO MANAGER

The portfolio manager is primarily responsible for various functions related to portfolio management, including, but not limited to, making recommendations (or implementing) with respect to the following: investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of the portfolio management team with more limited responsibilities.

Raymond T. Bridges serves as portfolio manager to the Fund. He is the Managing Member of the Sub-Adviser, which he founded in 2018. Mr. Bridges has extensive educational and professional experience in finance. He holds an Economics Degree from Rollins College granted in 2003 and a Master's Degree in Accounting from Nova Southeastern University. Mr. Bridges is a Certified Public Accountant in the State of Florida.

Along with the educational accomplishments, Mr. Bridges began his professional financial services experience in 2003 as an NFA Registered Associate completing his Series 3(Futures & Options) registration. In 2004, Mr. Bridges was a Principle in a Commodity Trading Advisor, Advanced Funds LLC. In 2011, Mr. Bridges was insurance licensed in Florida with Northwestern Mutual Insurance Company. In 2012, Mr. Bridges earned his FINRA Series 7 (General Securities Representative) & Series 66 (Uniform Combined State Law). Prior to Bridges Capital LLC, Mr. Bridges worked with Wells Fargo Bank N.A., Northwestern Mutual Life Ins. Co., Advanced Futures Inc., and Advanced Funds LLC.

The Fund's SAI provides additional information about the portfolio manager, including other accounts managed, ownership in the Fund, and compensation.

OTHER SERVICE PROVIDERS

Quasar Distributors, LLC ("Distributor") serves as the distributor of Creation Units (defined above) for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant, and transfer agent for the Fund.

U.S. Bank National Association is the custodian for the Fund.

Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust.

Spicer Jeffries LLP, 4601 DTC Boulevard, Suite 700, Denver, Colorado 80237 serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

THE EXCHANGE

Shares of the Fund are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated, in the determination of the timing of, prices of, or quantities of Shares of the Fund to be issued, nor in the determination or calculation of the equation by which the Shares are redeemable. The Exchange has no obligation or liability to owners of the Shares of the Fund in connection with the administration, marketing or trading of the Shares of the Fund. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

BUYING AND SELLING FUND SHARES

Shares will be issued or redeemed by the Fund at NAV per Share only in Creation Units of 10,000 Shares. Creation Units are generally issued and redeemed only in-kind for securities although a portion may be in cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or "APs," will purchase and redeem Shares directly from the Fund. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

Except when aggregated in Creation Units, Shares are not redeemable with the Fund.

BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. The Trust does not impose any redemption fees or restrictions on redemptions of Shares in the secondary market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Fund and no minimum number of Shares you must buy.

Shares of the Fund are listed on the Exchange under the following symbol:

Fund	Trading Symbol
Bridges Capital Tactical ETF	BDGS

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

Book Entry. Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”), or its nominee, will be the registered owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or “street name” through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Fund.

Share Trading Prices. The trading prices of the Fund’s Shares may differ from the Fund’s daily NAV and can be affected by market forces of supply and demand for the Fund’s Shares, the prices of the Fund’s portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of the Fund’s portfolio every fifteen seconds during regular U.S. trading hours. This approximate value should not be viewed as a “real-time” update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

Continuous Offering. The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallocation within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

ACTIVE INVESTORS AND MARKET TIMING

The Board has evaluated the risks of market timing activities by the Fund's shareholders. The Board noted that the Fund's Shares can be purchased and redeemed directly from the Fund only in Creation Units by APs and that the vast majority of trading in the Fund's Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective, although in certain circumstances (e.g., in conjunction with a reallocation of the Fund's investments), such trades may benefit Fund shareholders by increasing the tax efficiency of the Fund. The Board also noted that direct trading by APs is critical to ensuring that the Fund's Shares trade at or close to NAV. In addition, the Fund will impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund's Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, the Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that provide distribution and shareholder services ("Service Providers"). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Fund because they would be paid on an ongoing basis.

NET ASSET VALUE

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m., Eastern time.

The Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market[®] ("NASDAQ") are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price ("NOCP"). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

Redeemable securities issued by open-end investment companies are valued at the investment company's applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Fund will determine the price of the security held by the Fund based on a determination of the security's fair value pursuant to policies and procedures approved by the Board.

To the extent the Fund holds securities that may trade infrequently, fair valuation may be used more frequently. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when the Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares' NAV performance to diverge from the Shares' market price and from the performance of various benchmarks used to compare the Fund's performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust maintains a website for the Fund at www.bridgesetf.com. Among other things, the website includes this Prospectus and the SAI, and will include the Fund's holdings, the Fund's last annual and semi-annual reports. The website shows the Fund's daily NAV per share, market price, and premium or discount, each as of the prior business day. The website also shows the extent and frequency of the Fund's premiums and discounts. Further, the website includes the Fund's median bid-ask spread over the most recent thirty calendar days.

Each day the Fund is open for business, the Trust publicly disseminates the Fund's full portfolio holdings as of the close of the previous day through its website at www.bridgesetf.com. A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI.

INVESTMENTS BY OTHER INVESTMENT COMPANIES

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7) of the Investment Company Act are subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by Rule 6c-11, Rule 12d1-4, or an exemptive order of the SEC.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Dividends and Distributions

Dividends and Distributions. The Fund intends to qualify each year as a regulated investment company under the Internal Revenue Code of 1986, as amended. As a regulated investment company, the Fund generally pays no federal income tax on the income and gains it distributes to you. The Fund expects to declare and to distribute all of its net investment income, if any, to shareholders as dividends on an annual basis. The Fund will distribute net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Avoid "Buying a Dividend." At the time you purchase Shares of the Fund, the Fund's NAV may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in the Fund just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend."

Taxes

Tax Considerations. The Fund expects, based on its investment objective and strategies, that its distributions, if any, will be taxable as ordinary income, capital gain, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gain no matter how long you have owned your Shares. A portion of income dividends reported by the Fund may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gain rates provided certain holding period requirements are met.

Taxes on Sales of Shares. A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss may be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your federal income tax return.

Backup Withholding. By law, if you do not provide the Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. The Fund also must withhold if the Internal Revenue Service ("IRS") instructs it to do so. When withholding is required, the amount will be 24% of any distributions or proceeds paid.

State and Local Taxes. Fund distributions and gains from the sale or exchange of your Shares generally are subject to state and local taxes.

Taxes on Purchase and Redemption of Creation Units. An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of purchase and the exchanger's aggregate basis in the securities surrendered and the cash amount paid. A person who exchanges Creation Units for equity securities generally will recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities received and the cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If the Fund redeems Creation Units in cash, it may recognize more capital gains than it will if it redeems Creation Units in-kind.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and U.S. estate tax and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. Exemptions from U.S. withholding tax are provided for (i) capital gain dividends paid by the Fund from long-term capital gains, if any (ii) interest-related dividends paid by the Fund from its qualified net interest

income from U.S. sources, if any, and (iii) short-term capital gain dividends, if any. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act (FATCA), the Fund will be required to withhold a 30% tax on (a) income dividends paid by the Fund, and (b) certain capital gain distributions paid by the Fund, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Possible Tax Law Changes. At the time that this prospectus is being prepared, various administrative and legislative changes to the federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will be made or what the changes might entail.

This discussion of “Dividends, Distributions and Taxes” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in the Fund.

FINANCIAL HIGHLIGHTS

The Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund will be in its annual and semi-annual reports to shareholders, when available. The annual report will explain the market conditions and investment strategies affecting the Fund's performance during the last fiscal year.

STATEMENT OF ADDITIONAL INFORMATION

The SAI dated April 5, 2023, which contains more details about the Fund, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

To receive a free copy of the latest annual or semi-annual report, when available, or the SAI, or to request additional information about the Fund, please contact us as follows:

PAPER COPIES

Please note that paper copies of the Fund's shareholder reports will generally not be sent, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on the Fund's website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

INFORMATION PROVIDED BY THE SECURITIES AND EXCHANGE COMMISSION

Information about the Fund, including its reports and the SAI, has been filed with the SEC. It can be reviewed on the EDGAR database on the SEC's internet site (<http://www.sec.gov>). You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's e-mail address (publicinfo@sec.gov) or by calling the SEC at (202) 551-8090.
