(the “Fund”)

Supplement dated May 2, 2022, to the Fund

**Summary Prospectus, Prospectus and Statement of Additional Information,
each dated March 24, 2022**

This supplement should be read in conjunction with your Summary Prospectus, Statutory Prospectus and Statement of Additional Information (“SAI”), be retained for future reference and is in addition to any existing Fund Supplement(s).

Change in Name of the Trust

The Board of Trustees of Alpha Architect ETF Trust, a Delaware statutory trust (the “Trust”) approved a change of the name of the Trust to “EA Series Trust.” Effective immediately, all references to the name of the Trust in each of the Summary Prospectus, Prospectus and SAI are hereby deleted and replaced with the EA Series Trust.

The change of the name of the Trust will not result in any changes in the investment objectives or investment strategies of the Fund.

New Assistant Treasurer for the Trust

Effective immediately, Sean Hegarty is added as Assistant Treasurer of the Trust. The section entitled “Management of the Funds—Officers” in the SAI is hereby amended to add the following information about the new officer:

Name and Year of Birth	Position(s) with Trust	Principal Occupation(s)
Sean Hegarty (1993)	Assistant Treasurer (since April 2022)	Chief Operating Officer, Empowered Funds, LLC (2022 - present); Assistant Vice President - Fund Administration, U.S. Bank Global Fund Services (2018 - 2022); Staff Accountant, Cohen & Company (2015 - 2018)

Updated Transaction Fees

Effective May 2, 2022, the table located in the “Transaction Fees” section in the Fund’s SAI is hereby deleted and replaced with the following:

Fund	Standard Transaction Fee	Variable Charge
ROC ETF	\$300*	Up to 2.00%

* The Transaction Fee may be higher for transactions outside the Clearing Process. In addition, one half of the Transaction Fee may be waived in conjunction with rebalancing transactions.

ROC ETF

Fund Summary

INVESTMENT OBJECTIVE

ROC ETF (the “Fund”) seeks capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table and example below.**

ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

Management Fee	0.49%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	<u>0.49%</u>

¹ Other Expenses are estimated for the current fiscal year.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year:	Three Years:
\$50	\$157

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. At the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively-managed exchange-traded fund (ETF) that will invest its assets in U.S.-listed equity securities of companies that, in the assessment of the Sub-Adviser (ROC Investments, LLC), are led by high-character Chief Executive Officers (CEOs).

CEOs are highest-ranking executives in a company, whose responsibilities include making major corporate decisions, managing the overall operations and resources of a company, and acting as the main point of communication between the board of directors and company operations. CEOs are often the public face of their companies. The primary responsibility of a CEO is to maximize the company's shareholder wealth. CEOs are also responsible for successfully navigating the interests of many groups, including shareholders, customers, employees, and different corporate divisions. Due to the significance of CEO responsibilities, the Sub-Adviser believes that CEO character can positively affect their company's return on assets and workforce engagement while reducing overall business risk.

The Sub-Adviser relies on the following multi-step process:

Integrity Scoring

The Sub-Adviser begins by analyzing an initial universe of companies that includes approximately the largest 1,000 U.S. companies (as measured by market capitalization). The Sub-Adviser assigns each company a score based on each CEO's perceived integrity (the "Integrity Score"). The Sub-Adviser derives Integrity Scores by assessing shareholder letters and management discussion and analysis sections from public shareholder reports ("Disclosure Materials"). The Sub-Adviser analyzes the Disclosure Materials using proprietary algorithms, which assess, among other factors, syntax, word counts, and grammar patterns. The Sub-Adviser then aggregates the analysis to identify Disclosure Materials with higher levels of transparency based on the analysis above. The Sub-Adviser believes greater levels of transparency in shareholder communications is generally commensurate with higher CEO character and integrity. The Sub-Adviser then ranks the companies based on the proprietary analysis to identify the companies with the greatest potential for high CEO character. In general, the highest scoring 150-250 names will be selected during this process.

The proprietary algorithms assess each company using a disciplined, standardized approach, and are not adjusted based on any company specific factors (e.g., CEO tenure or business complexity). Companies are included for further consideration only if the analysis of Disclosure Materials have statistically significant results (i.e., the results are not explainable by chance alone) results.

Supplemental Assessments

The Sub-Adviser then conducts supplemental assessments. Behavioral assessments are performed when relevant information is available to the Sub-adviser. Controversy assessments are conducted on all potential companies. In addition, Controversy assessments are made on an ongoing basis.

- ***Behavioral Assessment***

For a small subset of companies (approximately ten percent), the Sub-Adviser then refines CEO Integrity Scores based on behavioral assessments. That is, the Sub-Adviser seeks to conduct direct, behavioral interviews (described below) with a CEO's close professional colleagues, third-party analysts, and other personnel that the Sub-Adviser believes possess a vantage point to evaluate a particular CEO's character. Behavioral interviews are designed to evaluate how the CEO responded in specific situations, which is then used to extrapolate how the CEO may perform in the future.

The Sub-Adviser may also evaluate third-party sources that provide similar information (e.g., biographies written about the CEO, interview transcripts, company surveys, media appearances, etc.). In addition, the Sub-Adviser may evaluate other data sources that include broader, senior leadership team data. However, the Sub-Adviser provides more weight to data that is related specifically to a particular CEO and when data is available, includes a weighted value for the senior leadership as a whole.

Due to the logistical hurdles required to obtain the data contemplated by this Step, the Sub-Adviser may continue to utilize existing behavioral assessment data for several years. However, the Sub-Adviser typically provides less weight to old assessments.

- ***Controversy Assessment***

On an ongoing basis, the Sub-Adviser monitors CEOs within the initial universe to assess each company's then-current controversies, if any, especially as they relate to a CEO's character. For example, if a CEO has been credibly accused of fraudulent activity, that CEO would be deemed "high risk," and that CEO's Integrity Score would be lowered significantly. Candidate companies led by CEOs assessed as high risk would be excluded from consideration for addition to the Fund's portfolio. If Fund's portfolio includes a company whose CEO thereafter is assessed as high risk, that company's security will generally be sold. However, if the Fund retains the holding, the Sub-Adviser will subject that holding to elevated monitoring and possibly seek direct engagement with the company.

Composite Character Scoring

The Sub-Adviser uses a complex statistical analysis methodology to weight each CEO's Integrity Scoring and Supplemental Assessment score. Using that statistical methodology, each CEO from the initial universe is assigned a Composite Character Score. Thereafter, the Sub-Adviser analyzes the Composite Character Score holistically, reviewing available inputs, the recency of available data, the trends of the data (e.g., is a CEO's score improving or declining?), and other factors that the Sub-Adviser deems appropriate. The Sub-Adviser may modify a CEO's Composite Character Score based on the foregoing process. The top 75 to 150 companies, as measured by CEOs with the highest Composite Character Scores, are then included in the Fund's portfolio.

Fund Portfolio Construction

As noted above, the top 75 to 150 companies with CEOs that have the highest Composite Character Scores are included in the Fund's portfolio. Generally, on a quarterly basis, the Sub-Adviser will reallocate the weightings of the Fund's portfolio holdings based on their general corporate attributes (e.g., market capitalization, sector (like health care, consumer discretionary)) so that the composition of the Fund's overall portfolio is roughly consistent with that of a Sub-Adviser-selected traditional, broad-based U.S. securities index. As a result, the Fund's portfolio holdings will likely have significant weightings in several economic sectors, including information technology, healthcare, consumer discretionary, finance, and communication.

On an annual basis, the Sub-Adviser will conduct a complete reevaluation of the Fund's portfolio using the multi-step process described above. In addition, the Sub-Adviser may recommend that the Fund sell a particular position when (i) a CEO of company held by the Fund announces that they will exit their company, (ii) a particular CEO's behavior results in a high risk assessment, or (iii) a quarterly reallocation removes a company to maintain the Fund's broader weighting composition profile (as described in the paragraph above).

Because high-character CEOs tend to remain high-character and tend to stay at a single company for substantial periods, the Fund's portfolio turnover level is expected to be modest to low.

Character science is a nascent area of research. Therefore, the Sub-Adviser expects to continue to refine its proprietary methods over time.

PRINCIPAL RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading “*Additional Information About the Fund’s Risks.*”

Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

Models and Data Risk. The Sub-Adviser relies heavily on a proprietary statistical selection model as well as data and information supplied by third parties that are utilized by such model. To the extent the model does not perform as designed or as intended, the Fund’s strategy may not be successfully implemented and the Fund may lose value. If the model or data are incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities that would have been excluded or included had the model or data been correct and complete. Similarly, if data is unavailable (such as a third-party behavioral interview) may lead to the inclusion or exclusion of securities that would have been excluded or included had the data been available.

The effectiveness of the Sub-Adviser’s integrity model could be compromised due to a variety of factors. For example, CEOs that receive language coaching or use outsourced communications could cause the model to score a particular CEO more highly than it otherwise would, which may lead to suboptimal results, and negatively impact the Fund’s performance. In addition, the model has not been validated with respect to non-standard language patterns, such as non-native English speakers or cultural language differences.

Linguistic Analysis Risk. The Sub-Adviser relies upon linguistic analytics to inform its investment decisions. The application of linguistic analytics in finance is in a nascent stage of development. There is a risk that Sub-Adviser’s conclusions from its analysis of the data may be incorrect. In that case, the Fund’s portfolio may include companies with CEOs that lack the traits the Sub-Adviser seeks to capture or exclude companies with high-integrity CEOs. As a result, the Fund’s performance may be adversely affected.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Mid-Capitalization Companies Risk. Investing in securities of medium-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies’ securities may be more volatile and less liquid than those of more established companies. Often medium-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

Character Scoring Consideration Risk. Applying character scores to the investment process may exclude securities of certain issuers for non-investment reasons and therefore the Fund may forgo some market opportunities available to funds that do not use these criteria. As a result, at times, the Fund may underperform funds that are not subject to similar investment considerations. In addition, firms led by high character CEOs can perform poorly and corporate misconduct by the firm's management team and employees can occur.

Behavioral Assessment Access Risk. The Sub-Adviser can provide behavioral assessment scoring only if individuals with reasonable work or personal relationships with a CEO make themselves available for a behavioral assessment interview. Due to the Sub-Adviser's limited personnel resources and the limited availability of individuals with reasonable work or personal relationships with a CEO, behavioral assessments will be conducted only for a small fraction of the CEOs in the universe. As a result, the potential benefits of behavioral assessment scoring on the Fund's portfolio will be limited.

Management Risk. The Fund is actively managed and may not meet its investment objective based on the Adviser's or Sub-Adviser's success or failure to implement investment strategies for the Fund. In addition, the Fund's investment strategy is based on the Sub-Adviser's belief that companies with high-character CEOs will have higher stock prices over the long term than other companies. That thesis is relatively new and untested (against corporate scandals, returns, or otherwise), and may underperform other investment strategies.

Sector Risks. The Fund will be subject to economic sector risks. Those risks may be material and the risks differ for each of the various sectors. An overview of some of the sector risks is under the heading - *Additional Information about the Fund's Risks*.

ETF Risks.

- **Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- **Premium-Discount Risk.** The Shares may trade above or below their net asset value ("NAV"). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on CBOE BZX Exchange, Inc. (the "Exchange") or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares.
- **Cost of Trading Risk.** Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- **Trading Risk.** Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of the Fund's Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be significantly less liquid than the Fund's Shares, potentially causing the market price of the Fund's Shares to deviate from its NAV.

New Sub-Adviser Risk. The Sub-Adviser is a newly formed entity and has no experience with managing an exchange-traded fund, which may limit the Sub-Adviser’s effectiveness. In addition, although the Sub-Adviser has retained third-party vendors (e.g., compliance services, operations, etc.), the Sub-Adviser currently has limited resources, which may prevent it from being able to continue to provide sub-advisory services if the principal becomes incapacitated. Over time, the Sub-Adviser will augment its resources as market conditions permit. In addition, the Sub-Adviser regularly evaluates its business continuity plan with the Adviser to ensure continuity of operations and portfolio management should a disruption to operations occur.

New Fund Risk. The Fund is a recently organized, diversified management investment company with limited operating history. As a result, prospective investors have no or only a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Geopolitical/Natural Disaster Risks. The Fund’s investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

PERFORMANCE

The Fund has not commenced operations as of the date of this Prospectus. Performance information will be available in the Prospectus after the Fund has been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund’s average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at www.ROCETF.com.

INVESTMENT ADVISER & INVESTMENT SUB-ADVISER

Investment Adviser: Empowered Funds, LLC (“Adviser”)
Investment Sub-Adviser: ROC Investments, LLC (“Sub-Adviser”)

PORTFOLIO MANAGERS

Mr. Daniel Cooper is the Sub-Adviser’s Portfolio Manager, who, since 2022, is jointly and primarily responsible for the day-to-day management of the Fund.

Mr. Cooper provides his recommendations to Messrs. Brandon Koepke and Richard Shaner, Portfolio Managers of the Adviser, who, since 2022, have also primarily and jointly responsible for the day-to-day management of the Fund.

SUMMARY INFORMATION ABOUT PURCHASES, SALES, TAXES, AND FINANCIAL INTERMEDIARY COMPENSATION

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 10,000 Shares, called “Creation Units,” and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed ‘in-kind’ for securities and partially in cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market prices that change throughout the day. Market prices of Shares may be greater or less than their NAV. **Except when aggregated in Creation Units, the Fund’s shares are not redeemable securities.**

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is in an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

How Is the Fund Different From a Mutual Fund?

Redeemability. Mutual fund shares may be bought from, and redeemed with, the issuing fund for cash at NAV typically calculated once at the end of the business day. Shares of the Fund, by contrast, cannot be purchased from or redeemed with the Fund except by or through APs (typically, broker-dealers), and then principally for an in-kind basket of securities (and a limited cash amount). In addition, the Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 10,000 Shares, called "Creation Units."

Exchange Listing. Unlike mutual fund shares, Shares of the Fund will be listed for trading on the Exchange. Investors can purchase and sell Shares on the secondary market through a broker. Investors purchasing Shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. Secondary-market transactions do not occur at NAV, but at market prices that change throughout the day, based on the supply of, and demand for, Shares and on changes in the prices of the Fund's portfolio holdings. The market price of Shares may differ from the NAV of the Fund. The difference between market price of Shares and the NAV of the Fund is called a premium when the market price is above the reported NAV and called a discount when the market price is below the reported NAV, and the difference is expected to be small most of the time, though it may be significant, especially in times of extreme market volatility.

Tax Treatment. The Fund and the Shares have been designed to be tax-efficient. Specifically, the in-kind creation and redemption feature has been designed to protect Fund shareholders from adverse tax consequences applicable to non-ETF registered investment companies as a result of cash transactions in the non-ETF registered investment company's shares, including cash redemptions. Nevertheless, to the extent redemptions from the Fund are paid in cash, the Fund may realize capital gains or losses, including in some cases short-term capital gains, upon the sale of portfolio securities to generate the cash to satisfy the redemption.

Transparency. The Fund's portfolio holdings are disclosed on its website daily after the close of trading on the Exchange and prior to the opening of trading on the Exchange the following day. A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

Premium/Discount Information. Information about the premiums and discounts at which the Fund's Shares have traded will be available at www.ROCETF.com.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE AND STRATEGIES

The Fund's investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders upon prior written notice to shareholders.

Temporary Defensive Positions. From time to time, the Fund may take temporary defensive positions that are inconsistent with its principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. In those instances, the Fund may hold up to 100% of its assets in cash; short-term U.S. government securities and government agency securities; investment grade money market instruments; money market mutual funds; investment grade fixed income securities; repurchase agreements; commercial paper; cash equivalents; and exchange-traded investment vehicles that principally invest in the foregoing instruments. As a result of engaging in these temporary measures, the Fund may not achieve its investment objective.

ADDITIONAL INFORMATION ABOUT THE FUND'S RISKS

The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the sections titled "Fund Summary—Principal Investment Risks" above.

Behavioral Assessment Access Risk. The Sub-Adviser can provide behavioral assessment scoring only if individuals with reasonable work or personal relationships with a CEO make themselves available for a behavioral assessment interview. Due to the Sub-Adviser's limited personnel resources and the limited availability of CEOs and other relevant individuals, behavioral assessments will be conducted only for a small fraction of the CEOs in the universe. As a result, the potential benefits of behavioral assessment scoring on the Fund's portfolio will be limited.

Character Scoring Consideration Risk. Applying character scores to the investment process may exclude securities of certain issuers for non-investment reasons and therefore the Fund may forgo some market opportunities available to funds that do not use these criteria. As a result, at times, the Fund may underperform funds that are not subject to similar investment considerations. In addition, firms led by high character CEOs can perform poorly and corporate misconduct by the firm's management team and employees can occur.

ETF Risks.

- **APs, Market Makers, and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- **Cost of Trading Risk.** Investors buying or selling Shares in the secondary market pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if the Fund's Shares have more trading volume and market liquidity and higher if the Fund's Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads.

- **Premium-Discount Risk.** The Shares may trade above or below their NAV. The NAV of the Fund will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares, however, will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange and other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading in Shares. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities held by the Fund. However, given that Shares can be purchased and redeemed in large blocks of Shares, called Creation Units (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), and the Fund's portfolio holdings are fully disclosed on a daily basis, the Adviser believes that large discounts or premiums to the NAV of Shares should not be sustained, but that may not be the case.
- **Trading Risk.** Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will be maintained. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

Geopolitical/Natural Disaster Risks. The Fund's investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a global pandemic and major disruption to economies and markets around the world, including the United States. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue for an extended period of time, and may affect adversely the value and liquidity of the Fund's investments.

Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Large-Capitalization Companies Risk. Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Linguistic Analysis Risk. The Sub-Adviser relies upon linguistic analytics to inform its investment decisions. The application of linguistic analytics in finance is in a nascent stage of development. There is a risk that Sub-Adviser's conclusions from its analysis of the data may be incorrect. In that case, the Fund's portfolio may include companies with CEOs that lack the traits the Sub-Adviser seeks to capture or exclude companies with high-integrity CEOs. As a result, the Fund's performance may be adversely affected.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser's or Sub-Adviser's success or failure to implement investment strategies for the Fund. The Adviser's and Sub-Adviser's evaluations and assumptions regarding investments may not successfully achieve the Fund's investment objective given actual market trends. The Adviser will generally follow Sub-Adviser's investment recommendations to buy, hold, and sell securities and financial instruments. However, the Adviser may deviate from Sub-Adviser recommendations due to a clear error in a particular recommendation, compliance concerns (e.g., concentration limits), liquidity concerns, authorized participant-related concerns, or due to regulatory requirements.

In addition, the Fund's investment strategy is based on the Sub-Adviser's belief that companies with high-character CEOs will have higher stock prices over the long term than other companies. That thesis is relatively new and untested (against corporate scandals, returns, or otherwise), and may underperform other investment strategies.

Mid-Capitalization Companies Risk. The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some of these companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies.

Models and Data Risk. The Sub-Adviser relies heavily on a proprietary statistical selection model as well as data and information supplied by third parties that are utilized by the model. To the extent the model does not perform as designed or as intended, the Fund's strategy may not be successfully implemented and the Fund may lose value. If the model or data are incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities that would have been excluded or included had the model or data been correct and complete. Similarly, if data is unavailable, like a particular CEO would not agree to a behavioral interview, decisions made in their absence may lead to the inclusion or exclusion of securities that would have been excluded or included had the data been available. The use of predictive models has inherent risks. For example, the Sub-Adviser's models may incorrectly forecast future behavior, leading to potential losses. In addition, in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind), the Sub-Adviser's models may produce unexpected results, which can result in losses for the Fund. Furthermore, because predictive models are usually constructed based on historical data supplied by third parties, the success of relying on the models may depend heavily on the accuracy, reliability, and availability of the data.

Further, the effectiveness of the Sub-Adviser's integrity model could be compromised due to a variety of factors. For example, CEOs that receive language coaching or use outsourced communications could cause the model to score a particular CEO more highly than it otherwise would, which may lead to suboptimal results, and negatively impact the Fund's performance. In addition, the model has not been validated with respect to non-standard language patterns, such as non-native English speakers or cultural language differences.

New Fund Risk. The Fund is a recently organized, diversified management investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

New Sub-Adviser Risk. The Sub-Adviser has no experience with managing an ETF, which may limit the Sub-Adviser's effectiveness. In addition, although the Sub-Adviser has retained third-party vendors (e.g., compliance services, operations, etc.), the Sub-Adviser currently has only one employee and limited resources, which may prevent it from being able to continue to provide sub-advisory services if the principal becomes incapacitated. Over time, the Sub-Adviser will augment its resources as market conditions permit. In addition, the Sub-Adviser regularly evaluates its business continuity plan with the Adviser to ensure continuity of operations and portfolio management should a disruption to operations occur.

Sector Risks. The Fund will invest primarily in companies in the following sectors. As a result, the Fund will be subject to one or more of the following sector risks:

- **Communication.** Companies in the communication sector can be affected by, among other things, overall economic conditions, intense competition, technological innovation and obsolescence of existing technology, research and development costs, government regulation and changes in consumer preferences.
- **Consumer Discretionary.** Companies engaged in the design, production or distribution of products or services for the consumer discretionary sector are subject to the risk that their products or services may become obsolete quickly. The success of these companies can depend heavily on disposable household income and consumer spending. During periods of an expanding economy, the consumer discretionary sector may outperform the consumer staples sector, but may underperform when economic conditions worsen.
- **Financial Services.** Companies in the financial services sector are often subject to risks tied to the global financial markets, which have experienced very difficult conditions and volatility as well as significant adverse trends. The conditions in these markets have resulted in a decrease in availability of corporate credit, capital and liquidity and have led indirectly to the insolvency, closure or acquisition of a number of financial institutions.
- **Healthcare.** Healthcare companies' profitability may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising or falling costs of medical products and services, pricing pressure, litigation expenses, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies, governmental regulations and policies, and other market developments.
- **Information Technology.** The Fund will have exposure to companies operating in the information technology sector. Information technology companies may have limited product lines, financial resources and/or personnel. Information technology companies typically face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights.

FUND MANAGEMENT

Investment Adviser

Empowered Funds, LLC acts as the Fund's investment adviser. The Adviser is located at 19 East Eagle Road Havertown, PA 19083 and is wholly-owned by Alpha Architect LLC. The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services solely to the Fund and other exchange-traded funds. The Adviser was founded in October, 2013.

The Adviser is responsible for overseeing the management and business affairs of the Fund, and has discretion to purchase and sell securities in accordance with the Fund's objectives, policies and restrictions. The Adviser continuously reviews, supervises and administers the Fund's investment programs pursuant to the terms of investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. Because the Fund has not commenced operations prior to the date of this Prospectus, the Adviser did not receive a fee during the last fiscal year. The Adviser is entitled to receive the following Advisory Fee: 0.49%, which is shown as an annual rate as a percentage of average daily net assets.

The Adviser (or an affiliate of the Adviser) bears all of the Adviser's own costs associated with providing these advisory services and all expenses of the Fund, except for the fee payment under the Advisory Agreement, payments under the Fund's Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses, taxes (including tax-related services), interest (including borrowing costs), litigation expense (including class action-related services), and other non-routine or extraordinary expenses.

The Advisory Agreement for the Fund provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned.

Investment Sub-Adviser

Sub-Adviser: The Adviser has retained ROC Investments, LLC (the "Sub-Adviser"), an investment adviser registered with the SEC, to provide sub-advisory services for the Fund. The Sub-Adviser is organized as a Delaware limited liability company with its principal offices located at 930 Sierra Vista Dr., Redding, CA 96001, and was founded in June, 2021, and became a registered investment adviser in December, 2021. The Sub-Adviser is responsible for recommending the investments for the Fund, subject to the overall supervision and oversight of the Adviser and the Board. The Sub-Adviser will perform its services as a non-discretionary sub-adviser, which means that the Sub-Adviser will not be responsible for selecting brokers or placing the Fund's trades. Rather, the Sub-Adviser will provide trade recommendations to the Adviser and, in turn, the Adviser will be responsible for selecting brokers and placing the Fund's trades. It is anticipated that the Adviser will generally adhere to the Sub-Adviser's recommendations.

For its services, the Adviser pays Sub-Adviser a fee, which is calculated daily and paid monthly, at an annual rate based on the Fund's average daily net assets as annual rate of 0.25%, which is shown as a percentage of average daily net assets.

Fund Sponsor

The Adviser has entered into a fund sponsorship agreement with the Sub-Adviser pursuant to which the Sub-Adviser is also the sponsor of the Fund ("Fund Sponsor"). Under this arrangement, the Fund Sponsor has agreed to provide financial support to the Fund (as described below) and, in turn, the Adviser has agreed to share with the Fund Sponsor a portion of profits, if any, generated by the Fund's Advisory Fee (also as described below). Every month, the Advisory Fee, which is a unitary management fee, is calculated and paid to the Adviser.

If the amount of the unitary management fee exceeds the Fund's operating expenses and the Adviser-retained amount, the Adviser pays the net total to the Fund Sponsor. The amount paid to the Fund Sponsor represents both the sub-advisory fee and any remaining profits from the Advisory Fee. During months where there are no profits or the funds are not sufficient to cover the entire sub-advisory fee, the sub-advisory fee is automatically waived.

If the amount of the unitary management fee is less than the Fund's operating expenses and the Adviser-retained amount, the Fund Sponsor is obligated to reimburse the Adviser for the shortfall.

APPROVAL OF ADVISORY AGREEMENT & INVESTMENT SUB-ADVISORY AGREEMENT

A discussion regarding the basis for the Board's approval of the Advisory Agreement and the sub-advisory agreement with respect to the Fund will be made available in the Fund's annual report or semi-annual report.

PORTFOLIO MANAGERS

The portfolio managers are jointly and primarily responsible for various functions related to portfolio management, including, but not limited to, making recommendations (or implementing) with respect to the following: investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of the portfolio management team with more limited responsibilities.

Mr. Daniel Cooper has been portfolio manager of the Fund since 2022. Mr. Cooper started his career at Fox River Financial Resources, LLC in 1997, where he gained exposure to quantitative investing. He pioneered the firm's character investment strategy, creating a model to quantify the character and integrity of public company CEOs. He managed the portfolio for four years. In 2009, he went on to join West Rock Capital. Mr. Cooper went on to found UNITY Development Group in 2013, a special purpose company seeking to build a railway from Dar es Salaam, Tanzania to Kigali, Rwanda. Mr. Cooper holds a Bachelor of Science in Political Science from Calvin University.

Mr. Brandon Koepke has been portfolio manager of the Fund since 2022. Mr. Koepke has advised on trading and execution matters for the Adviser since January 2017, where he heads the trading department and assists in quantitative research. Prior to Mr. Koepke's tenure with the Adviser, Mr. Koepke was a software engineer for Amazon. Mr. Koepke has a B.Sc in Computer Science and a B.Comm specializing in Finance from the University of Calgary. A B.Comm degree is an undergraduate degree in commerce and related subjects. He is also a CFA® Charterholder.

Mr. Richard Shaner has been portfolio manager of the Fund since 2022. Mr. Shaner has advised on trading and execution matters for the Adviser since January 2021, where he supports trading operations and assists in quantitative research. Prior to Mr. Shaner's tenure with the Adviser, Mr. Shaner executed various trading strategies for a private family office. Mr. Shaner has a B.Sc in Kinesiology and Applied Physiology from the University of Colorado. He is also a CFA® Charterholder.

Messrs. Koepke and Shaner are responsible for implementing the Fund's investment strategies.

The Fund's SAI provides additional information about the portfolio managers, including other accounts each manages, their ownership in the Fund, and compensation.

OTHER SERVICE PROVIDERS

Quasar Distributors, LLC ("Distributor") serves as the distributor of Creation Units (defined above) for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant, and transfer agent for the Fund.

U.S. Bank National Association is the custodian for the Fund.

Practus, LLC, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust.

Spicer Jeffries LLP, 4601 DTC Boulevard, Suite 700, Denver, CO 80237, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

THE EXCHANGE

Shares of the Fund are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated, in the determination of the timing of, prices of, or quantities of Shares of the Fund to be issued, nor in the determination or calculation of the equation by which the Shares are redeemable. The Exchange has no obligation or liability to owners of the Shares of the Fund in connection with the administration, marketing or trading of the Shares of the Fund. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

BUYING AND SELLING FUND SHARES

Shares will be issued or redeemed by the Fund at NAV per Share only in Creation Units of 10,000 Shares. Creation Units are generally issued and redeemed only in-kind for securities although a portion may be in cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or "APs," will purchase and redeem Shares directly from the Fund. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

Except when aggregated in Creation Units, Shares are not redeemable with the Fund.

BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. The Trust does not impose any redemption fees or restrictions on redemptions of Shares in the secondary market. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Fund and no minimum number of Shares you must buy.

Shares of the Fund will be listed on the Exchange under the following symbol:

Fund
ROC ETF

Trading Symbol
ROCI

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

Book Entry. Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC"), or its nominee, will be the registered owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or "street name" through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Fund.

Share Trading Prices. The trading prices of the Fund's Shares may differ from the Fund's daily NAV and can be affected by market forces of supply and demand for the Fund's Shares, the prices of the Fund's portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of the Fund's portfolio every fifteen seconds during regular U.S. trading hours. This approximate value should not be viewed as a "real-time" update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

Continuous Offering. The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

ACTIVE INVESTORS AND MARKET TIMING

The Board has evaluated the risks of market timing activities by the Fund’s shareholders. The Board noted that the Fund’s Shares can be purchased and redeemed directly from the Fund only in Creation Units by APs and that the vast majority of trading in the Fund’s Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective, although in certain circumstances (e.g., in conjunction with a reallocation of the Fund’s investments), such trades may benefit Fund shareholders by increasing the tax efficiency of the Fund. The Board also noted that direct trading by APs is critical to ensuring that the Fund’s Shares trade at or close to NAV. In addition, the Fund will impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund’s Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, the Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that provide distribution and shareholder services (“Service Providers”). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Fund because they would be paid on an ongoing basis.

NET ASSET VALUE

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m., Eastern time.

The Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market[®] (“NASDAQ”) are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price (“NOCP”). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

Redeemable securities issued by open-end investment companies are valued at the investment company’s applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Fund will determine the price of the security held by the Fund based on a determination of the security’s fair value pursuant to policies and procedures approved by the Board.

To the extent the Fund holds securities that may trade infrequently, fair valuation may be used more frequently. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when the Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares’ NAV performance to diverge from the Shares’ market price and from the performance of various benchmarks used to compare the Fund’s performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust maintains a website for the Fund at www.ROCETF.com. Among other things, the website includes this Prospectus and the SAI, and will include the Fund’s holdings, the Fund’s last annual and semi-annual reports (when available). The website will show the Fund’s daily NAV per share, market price, and premium or discount, each as of the prior business day. The website will also show the extent and frequency of the Fund’s premiums and discounts. Further, the website will include the Fund’s median bid-ask spread over the most recent thirty calendar days.

Each day the Fund is open for business, the Trust publicly disseminates the Fund’s full portfolio holdings as of the close of the previous day through its website at www.ROCETF.com. A description of the Trust’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s SAI.

INVESTMENTS BY OTHER INVESTMENT COMPANIES

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7) of the Investment Company Act are subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by Rule 6c-11, Rule 12d1-4, or an exemptive order of the SEC.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Dividends and Distributions

Dividends and Distributions. The Fund intends to elect and qualify to be treated each year as a regulated investment company under the Internal Revenue Code of 1986, as amended. As a regulated investment company, the Fund generally pays no federal income tax on the income and gains it distributes to you. The Fund expects to declare and to distribute its net investment income, if any, to shareholders as dividends annually. The Fund will distribute net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Avoid "Buying a Dividend." At the time you purchase Shares of the Fund, the Fund's NAV may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in the Fund just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend."

Taxes

Tax Considerations. The Fund expects, based on its investment objective and strategies, that its distributions, if any, will be taxable as ordinary income, capital gain, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gain no matter how long you have owned your Shares. A portion of income dividends reported by the Fund may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gain rates provided certain holding period requirements are met.

Taxes on Sales of Shares. A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss may be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your federal income tax return.

Backup Withholding. By law, if you do not provide the Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. The Fund also must withhold if the Internal Revenue Service (“IRS”) instructs it to do so. When withholding is required, the amount will be 24% of any distributions or proceeds paid.

State and Local Taxes. Fund distributions and gains from the sale or exchange of your Shares generally are subject to state and local taxes.

Taxes on Purchase and Redemption of Creation Units. An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of purchase and the exchanger’s aggregate basis in the securities surrendered and the cash amount paid. A person who exchanges Creation Units for equity securities generally will recognize a gain or loss equal to the difference between the exchanger’s basis in the Creation Units and the aggregate market value of the securities received and the cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If the Fund redeems Creation Units in cash, it may cause the Fund to incur certain costs, such as brokerage costs. In addition, cash redemptions may cause the Fund to recognize more capital gains or losses than it will if it redeems Creation Units in-kind.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and U.S. estate tax and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. An exemption from U.S. withholding tax is provided for capital gain dividends paid by the Fund from long-term capital gains, if any. The exemptions from U.S. withholding for interest-related dividends paid by the Fund from its qualified net interest income from U.S. sources and short-term capital gain dividends have expired for taxable years of the Fund that begin on or after January 1, 2014. It is unclear as of the date of this prospectus whether Congress will reinstate the exemptions for interest-related and short-term capital gain dividends or, if reinstated, whether such exemptions would have retroactive effect. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act (FATCA), the Fund will be required to withhold a 30% tax on (a) income dividends paid by the Fund, and (b) certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive new reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Possible Tax Law Changes. At the time that this prospectus is being prepared, various administrative and legislative changes to the federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will be made or what the changes might entail.

This discussion of “Dividends, Distributions and Taxes” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in the Fund.

FINANCIAL HIGHLIGHTS

The Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

If you would like more information about the Fund and the Trust, the following documents are available free, upon request:

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund will be in its annual and semi-annual reports to shareholders, when available. The annual report will explain the market conditions and investment strategies affecting the Fund’s performance during the last fiscal year.

STATEMENT OF ADDITIONAL INFORMATION

The SAI dated March 24, 2022, which contains more details about the Fund, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

To receive a free copy of the latest annual or semi-annual report, when available, or the SAI, or to request additional information about the Fund, please contact us as follows:

PAPER COPIES

Please note that paper copies of the Fund’s shareholder reports will generally not be sent, unless you specifically request paper copies of the Fund’s reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on the Fund’s website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

INFORMATION PROVIDED BY THE SECURITIES AND EXCHANGE COMMISSION

Information about the Fund, including its reports and the SAI, has been filed with the SEC. It can be reviewed on the EDGAR database on the SEC’s internet site (<http://www.sec.gov>). You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC’s e-mail address (publicinfo@sec.gov) or by calling the SEC at (202) 551-8090.

Investment Company Act File No. 811-22961.
